DFAS System Life Cycle (SLC 6.0) Seminar

Welcome

DFAS-DTC
2002 & 2003

DFAS System Life Cycle (SLC) Seminar

- Introduction to the DFAS System Life Cycle

  - Acquisition of new systems

  - Maintenance and evolution of existing systems

  - Checkpoints, reviews, and milestones

- Tailoring the standard SLC for your program's situation

- Roles and responsibilities in development and maintenance decisions

- Tools and resources supporting life cycle activities, program management, and development

- Information assurance and security in the SLC

- Software development practices, tools, and resources

- DFAS Corporate Information Infrastructure (DCII)

Who Supports System Life Cycle?

- ## DFAS DTC
  - Life Cycle Management (LCM) support is provided by Information & Technology under the direction of Ms. Judy Munger.
  - Assistance is available to help programs tailor the SLC to their specific situation.
- ## DFAS TSO SESO
  - TSO SESO, directed by Mr. Jim Palecek, provides system engineering and software process support to development and maintenance project.
- ## DTC and SESO work cooperatively to provide seamless assistance across DFAS.

DFAS System Life Cycle (SLC) Seminar

– **Introduction to the DFAS System Life Cycle**

– **Roles and Responsibilities**

– **System Acquisition Through Milestone A**

– **System Acquisition Through Milestone B**

– **System Acquisition Through Milestone C**

– **Software Development**

– **System Acquisition Through Deployment**

– **System Maintenance**

– **DFAS Corporate Information Infrastructure (DCII)**

– **Information Assurance / Security**

– **Tailoring the Life Cycle to Your Program**
